IBD Lighting Conversion to LED

Technical Bulletin Reference No. 2501-001

Beginning in May 2018, any Ice Beverage Dispenser ordered from Lancer will be outfitted with LED lighting components instead of the standard fluorescent lighting. For current units out in the field with fluorescent lighting, there are simple conversion kits available to order for each specific size and style of Ice Beverage Dispenser. Each conversion kit comes complete with a set of instructions specifically designed to fit the units configuration. Below are the different conversion kits available and the units that they service:

Kit Part Number	Units
82-5169	Legacy IBD 22", 25", 30"
82-5264	Legacy IBD 44"
82-5263	FS 30" Blue Star 22", 25", 30"

Flavor Select (FS) 30"

IBD Legacy 22"

IBD Legacy 44"

For more information on LED and the Ice Beverage Dispenser conversion kits contact Lancer Customer Service at (800) 729-1500.

Flavor Shot 30" IBD Carbonator Conversion

Technical Bulletin Reference No. 2501-002

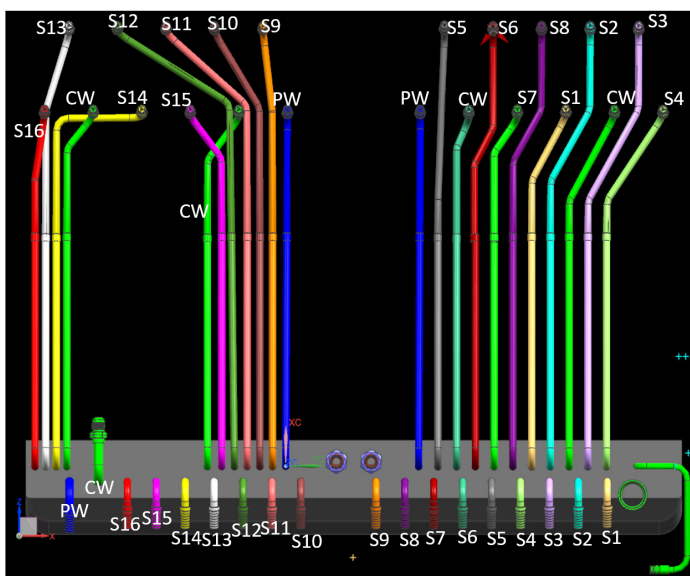

Beginning in May 2018, the Flavor Select (FS) 30" dispenser will no longer come equipped with the square "picture frame" carbonator assembly, but will be replaced with the cylindrical, "muffler" carbonator assembly. The cylindrical carbonator is easier to maintain, service, and manufacture.

This change also affected the syrup and water lines in the cold plate assembly. The syrup/water lines had to be re-configured in order to fit the new carbonator assembly, which altered the order of the inlets.

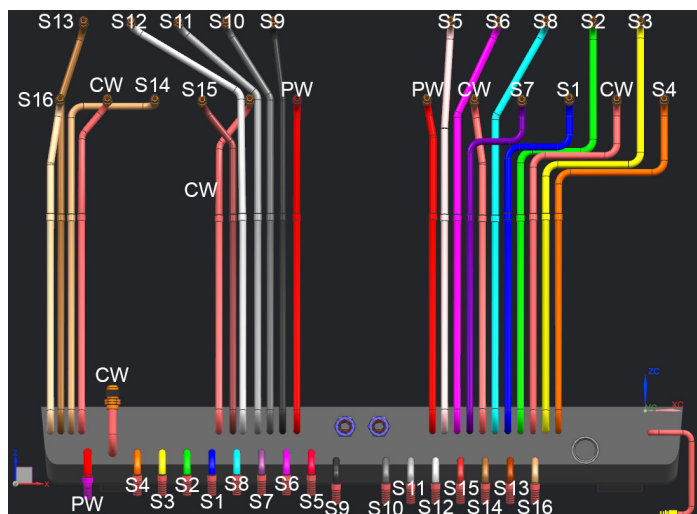

An updated plumbing diagram will be provided on the unit, as well as on the unit's manual and installation guide.

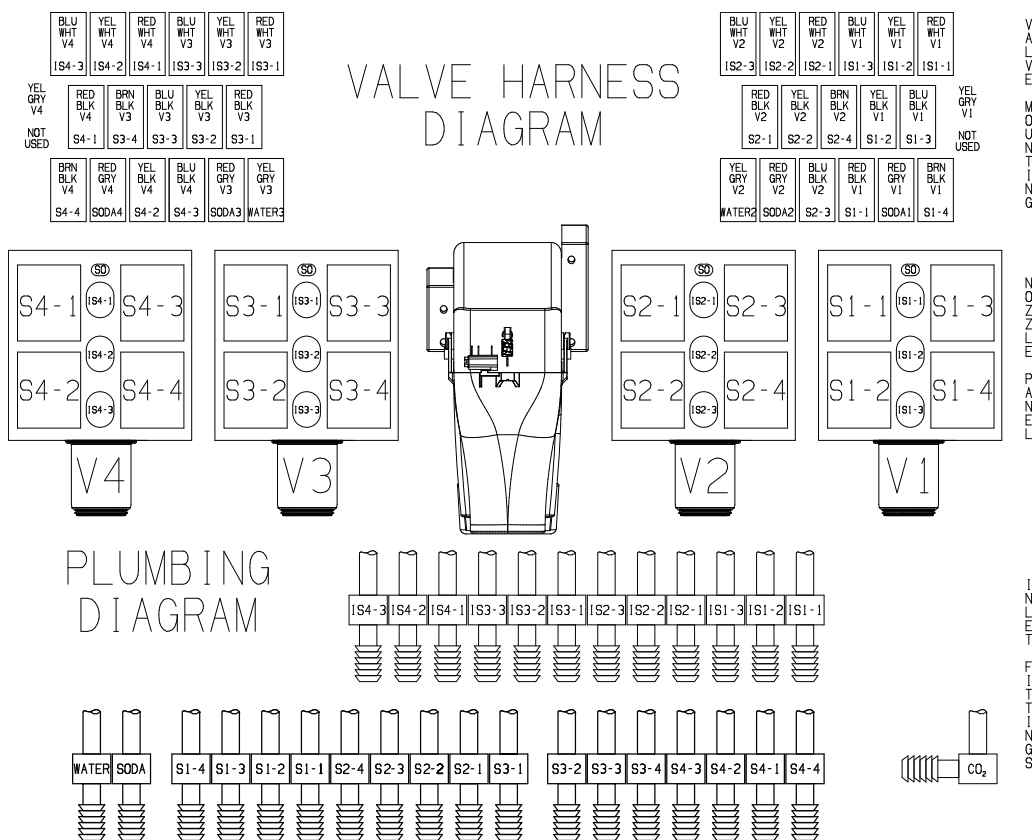

Old Cold Plate Assembly, PN: 09-0314

New Cold Plate Assembly, PN: 09-0338

New Plumbing Diagram, PN: 06-3600
