Update Brands/Flavors

1. Create a USB drive with the updated *.brand* file in a folder named "brands" as shown in the image below.

Format to "FAT32"

flavors

brands

Flavors.brand

sensation.brand
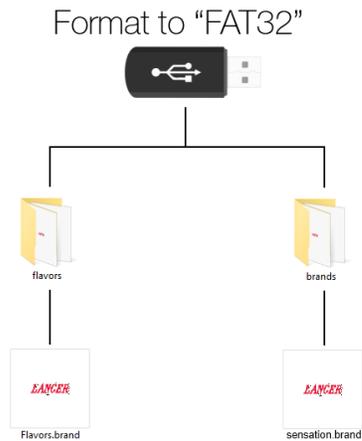

2. Plug the USB into the port on the side of the PCB controller box, located in the upper left corner of the front of the unit.

A

A. USB Port
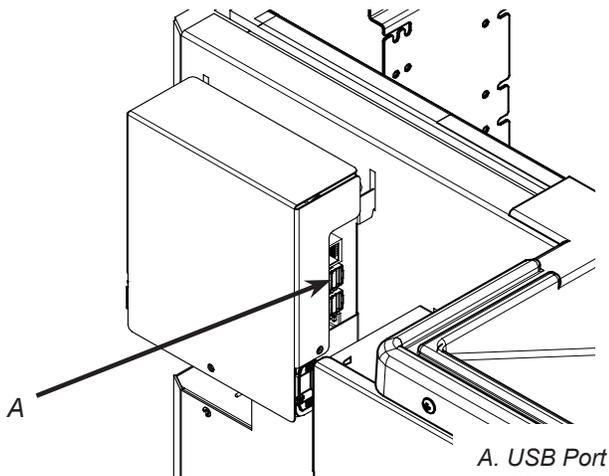

3. Access the Service menu on the left side screen and press the *Data Management* button.

Menu

System	Lighting	Sold Out
Time & Delays	Valve Configuration	Maintenance
Data Management	Component Versions	Test Solenoids

Discard Changes and Exit

UI Version: v1.43.011
DC Version: v1.01.046
Current access: Level 6

Save Settings and Exit
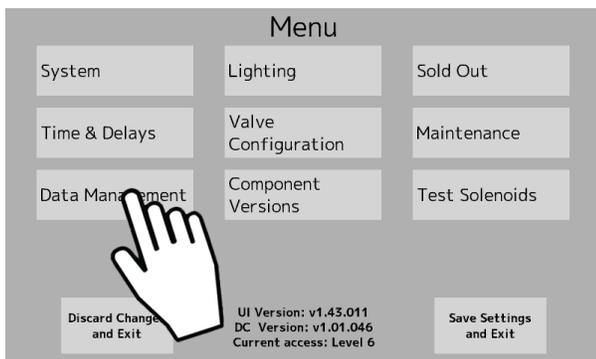

4. In the "Update from USB" section, press the *Brands* button.
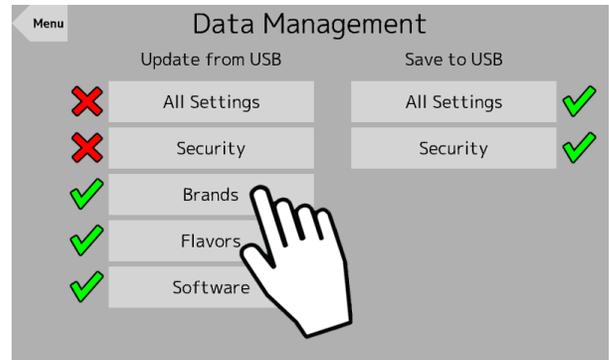

5. Once the Brands button turns green then the updated brands will be available.
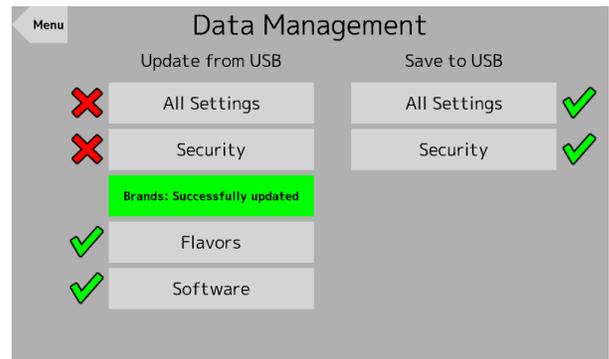

6. Repeat Steps 2 - 5 for the right side PCB and screen.
